
Atlante to attend VEM2023 with its proposal to increase the number of fast and ultra-fast chargers in Spain

- The company of NHOA Group will be present, along with more than 70 companies, from September 8th to 10th at the fair organized by AEDIVE in Plaza Colón in Madrid

Madrid, 4 September 2023 – Atlante, the company of NHOA Group (NHOA.PA, formerly Engie EPS) dedicated to electric vehicles fast and ultra-fast charging infrastructure, will attend the *Feria del Vehículo Eléctrico* in Madrid (VEM2023).

The eighth edition of VEM2023 will be held from September 8th to 10th at Plaza de Colón, alongside over 70 companies expected, aiming to double the over 25,000 visitors from the previous edition. The event is considered one of the most important as it brings together major companies from the energy and e-mobility sector and is organized by AEDIVE (Business Association for the Development and Promotion of Electric Mobility), of which Atlante has been a member since its arrival in Spain in April 2022, supporting its growth within the territory.

Atlante will be present at booth number C19 within the central exhibitor area, to display their innovative proposals to contribute to sustainable mobility through the installation of fast and ultra-fast charging points throughout the national territory.

"Being exhibitors at a leading electric mobility event in Madrid and at the national level is a great opportunity for a brand like Atlante, which has international recognition and aims to become the reference network in the Iberian Peninsula. We hope to welcome many visitors and have the opportunity to meet new industry players and share knowledge with our colleagues," comments **Jorge Colom Gonzales, Head of Growth Atlante Iberia**.

At its booth, Atlante will offer a 3D experience where attendees can enjoy, thanks to the latest technologies, a sensory experience of sustainable mobility, as well as better understand everything related to EV chargers and their charging types, always promoting fast and ultra-fast charging solutions to optimize time. They will also have the opportunity to provide reviews and ratings, aiding in the development of the best charging experience with the end user in mind.

Currently, Atlante has more than 3,200 charging points online and under construction across 4 countries, and plans to reach over 5,000 fast charging points by 2025. Following the recent agreement to install fastcharging points in Avanza Food restaurants and the deployment in the northern part of the country, Atlante consolidates its expansion on the path of the energy transition, continuing the deployment of its network in the Iberian Peninsula.

Atlante

Atlante is a company of NHOA Group (NHOA.PA, formerly Engie EPS), global player in energy storage and e-mobility, which develops technologies enabling the transition towards clean energy and sustainable mobility, shaping the future of a next generation living in harmony with our planet.

Atlante is developing the largest fast and ultra-fast charging network in Southern Europe, 100% enabled by renewables, energy storage and vehicle-grid-integrated (VGI). It aims to install in Italy, France, Spain and Portugal 5,000 fast and ultra-fast points of charge by 2025, and over 35,000 by 2030.

Operating since October 2021, Atlante has today more than 1,200 charging points online in its four countries with thousands more under construction and development. Leveraging on the technological heritage of the NHOA Group, including via collaboration with its sister company Free2move eSolutions, Atlante is a preferential network of the Stellantis automotive group and its customers. Atlante stations are fully interoperable and can be accessed by virtually any e-mobility app or charging card, and by any make and model of electric vehicles.
